- Knowledge of Data Structures and Algorithms.

SKILLS

Languages

Java, C++, C, HTML, JavaScript

Frameworks / Libraries

Spring Boot, JPA/Hibernate, Android

Data

Oracle, MySQL

Middleware

REST, SOAP, XML

Environment / Infrastructure

Continuous Integration (Jenkins), SonarQube, GitHub

Software / Tools

STS, Eclipse, MS Visual Studio, Android Studio, Gradle, Maven

EDUCATION

Government College of Engineering, Amaravati, Maharashtra, India

B.E. Computer Science & Engineering – 2007

RECENT EXPERIENCE

Capgemini - Senior Consultant

Worked as Senior Java Backend and Android Developer.

- Developed a set of microservices to serve multiple countries at one time.

- Used a microservice architecture, with Spring Boot-based services interacting through RESTful API endpoints. Deployed services to Pivotal Cloud Foundry Containers.

- Designed a multi-tenant approach in Spring Boot to accept data from different targets and persists same entities in different databases.

- Designed and simplified a complex way of transforming Input Data Object into Output Data Object using Rules specified for an Entity. (less than 1s)

- Business Values achieved as Client Job of 30 minutes reduced to 5 seconds without any human error.

- Involved in multiple iterations and carried out sprint work under Safe Agile methodology, using test-driven development (JUnit on the back-end).

- Developed an Employee Directory Android Mobile Application.

- Developed IBM Mobile First Platform Java Adapters.

PRIOR EXPERIENCE

Infosys – Technology Analyst

Worked as Android Developer

- Developed Notification and Demand Draft Module for Finacle Mobile Banking Product Release

- Involved in defect fixing and enhancements for Finacle Mobile Banking Product Release.

- Developed Proof of concepts Android Apps for Google Cloud Messaging Services, BUMP APIs, Gesture and Voice APIs.

Wipro – Senior Software Engineer

Worked as Java, C++ and C Developer

- Developed UI Screens and Setup module for Intel Vizio Google TV in Android.

- Worked as C++ Brew Developer and developed an interface to Download Manager using IDownload APIs which communicates between Application Extension and Download Manager for Qualcomm.

- Build and Integration engineer in Target UMTS team for Qualcomm

- Development of Cross Platform component in RichUI development module for Samsung Handset Platform (SHP) in mobile phones.

- Development of Personal Information Management Application module for Toshiba mobile which supports Import/Export of vObject as per IRMC standard in C Language.

- Enhancement of Phonebook module for NB1 and the maintenance of import & export library for vObjects in Toshiba mobile phones.
